

Zak Nitsch

Full-Stack Web Developer (Remote)

Email: zaknitsch@gmail.com

Web: zaknitsch.com

About Me

Hi, my name is Zak and I'm a full-stack web developer with over 10 years of experience building robust, well-tested web applications using React, TypeScript, and modern testing frameworks. I collaborate closely with cross-functional teams to deliver feature-rich solutions, leveraging my deep technical expertise to guide projects from concept to deployment. I'm passionate about sharing knowledge through planning sessions, pair programming, and code reviews, helping junior developers grow into confident, capable engineers. My focus is on building scalable systems and fostering a culture of technical excellence through mentorship and collaboration.

I am most skilled in: React , TypeScript and Eating Burritos .

I am improving in: Go , k8s and Running .

Projects

ZedChat

zedlove.github.io/zedchat

This project was started in early 2023 to try using Svelte. It hasn't had much attention since then, so it's a bit rough around the edges.

Experience

Arctic Wolf Networks

Software
Developer

April 2023 - Current

arcticwolf.com

Develop and maintain feature-rich, well-tested web applications supporting customer onboarding across stacks using Python, Go, and TypeScript.

HealthHub Patient

Contributed to analysis, high-level design, implementation, code review, testing, automation, deployment and bug fixing for various web applications, tools and services using a stack comprised of multiple technologies, languages and

**Engagement
Solutions**
**Front End Web
Developer**

March 2020 -
February 2023

frameworks, including React, TypeScript, Node, Postgres, Python, Ansible, Sentry and GitLab Pipelines. Baseline code quality, functionality and standards were ensured with eslint and Jest unit tests.

As a main developer of a video calling application, amongst other product features, took codebase maintainance seriously, acting as a keen steward of internal and external software quality. Also contributed to promoting adoption and maintaining a shared eslint config, Renovate, Sentry and a custom-built component design system.

Metail
**Full Stack Web
Engineering
Contractor**

January 2019 -
June 2019

metail.com

Contracted for full-stack web services including Clojure/ClojureScript work and JavaScript for an internal Photoshop Plugin. Joined a team of 3 other developers to continue development on an internal tool to manage the workflow for a composed photography process.

Experience working with:

- Clojure/ClojureScript and various libraries (including leiningen build tool)
- Postgres Databases with Flyway migrations
- AWS infrastructure including S3, EC2, RDS and SQS

Macadamian
**Intermediate
Software
Developer**

November 2017 -
December 2018

macadamian.com

Joined several teams ranging in size from 5-10 engineers working on legacy projects and an internal product built with an array of technologies such as Knockout, TypeScript, Angular, node.js, robot testing framework, Python as well as git and gerrit for SCM

Metail
**Junior Web
Engineer**

November 2015 -
September 2017

metail.com

Learned ClojureScript and Om.Next (a wrapper around Facebook's React) to produce a mobile-first overhaul of an existing desktop-focused SPA. Experience working with:

- Clojure/ClojureScript and various libraries (including leiningen build tool)
- Postgres Databases with Flyway migrations
- AWS infrastructure including S3, EC2, RDS and SQS

Grip Limited
**Front End
Developer**

Completed various types of projects such as responsive HTML email campaigns, contest websites featuring simple JavaScript-based games (spot the differences, matching, etc.) as well as full site rebuilds.

December 2012 -
August 2015
griplimited.com

- CSS written using SASS pre-compiler with custom animations controlled by JavaScript (jQuery)
- interacted with many third-party APIs (Facebook, Twitter, YouTube, etc.)
- used both SVN and Git version control system

Education

Humber College

Web Design, Development and Maintenance Certificate

2011 - 2012

Fanshawe College

Multimedia Design and Production

2008 - 2010

A Little More About Me

Alongside my interests in working with web technologies some of my other interests and hobbies are:

- Baseball
- Music
- Rubik's Cubes
